

2009 Online State Approved Nursing Assistant Course- HSC 1379

Program Overview:

The Online Nursing Assistant course is an excellent way to begin your career in the medical field. With this course you are able to complete the classroom portion of the course from home. Your laboratory times and clinical experience will be done on campus and at arranged clinical sites. This course gives you the flexibility of choosing to complete the course at a time that works with your schedule. It also provides a way to take part of the course without driving to class and paying for gas. It is a great advantage for people with busy schedules or those currently in college. Our online instructor will monitor your progress and be available to assist you. You will be given immediate feedback on your tests. This is the first state approved Online Blended Nursing Assistant Course approved through the South Carolina Department of Health and Human Services in our state. *(All students need to be 18 years of age. Special circumstances on age requirement would have to be addressed with program manager of CEHHS).*

Cost: \$465.00 (Chester \$545 + health physical required). Books are available at York Tech bookstore.

Testimonials:

"I care for an 86 year old lady 3 days a week and every day I am experiencing what I am learning in my text books. Being able to work on line with my schedule and earn a living at the same time is wonderful for me."

"The course is far superior to other online courses I have taken."

"I am very impressed the online students are as equally prepared as the traditional students to complete the lab and clinical experiences."
