# Digital Photography

## **Digital Photography 101 (\$135 course fee)**

In this course you will learn the various shooting modes and other features of operating your personal digital camera. You will also learn aperture, shutter speed, ISO and depth of field. Additional course features including learning how to download images to your computer and how to burn a back up CD. No prior photography knowledge required. You must bring your camera and manual.

|             |       |                    |
|-------------|-------|--------------------|
| 01/10-01/24 | 6-9pm | Tuesday & Thursday |
| 02/02-02/16 | 6-9pm | Tuesday & Thursday |
| 03/13-03/27 | 6-9pm | Tuesday & Thursday |

A camera with DSLR (Digital Single Lens Reflex) is recommended.

## **Digital Photography, Advanced (\$130 course fee)**

In this course you will explore and shoot only in the manual mode. You will learn the basics of lighting, be introduced to different photography “styles” and touch on editing and storing your images. Prerequisite: Digital photography 101 course or have a thorough understanding of Aperture, Shutter speed, depth of field and ISO. Prior experience will be assessed in a phone interview with the instructor. You must bring your camera and manual. A tripod is helpful on location shoot but not required.

April Classes TBA

A camera with DSLR (Digital Single Lens Reflex) is recommended.
