ICD-10 Medical Coding: Preparation and Instruction for Implementation

This nationally recognized ICD-10 Medical Coding online certificate training course covers the recently upgraded diagnostic and procedural medical coding system, and will soon be mandated by the Federal government for use in the healthcare industry in insurance processing, reimbursement, and statistical data gathering.

This noncredit, online medical coding program will teach students how to prepare for and implement the massive changes to the existing coding system.

This new program will present a comprehensive overview of the changes in store for both diagnostic and procedural medical coding along with detailed information on the impacts of the medical coding changes to coders, healthcare staff, physicians, software systems, documentation, and information technology.

Textbook included. This online noncredit program is offered in partnership with major Colleges and Universities.

This program includes:

- Comprehensive overview of the objectives, edits, and changes within the soon-to-be released International Classification of Diseases, 10th edition (ICD-10).
- Methodology and Template for planning HIM and non-HIM staff, physician, and allied health personnel education.
- Explanation of requirements for upgrading existing software applications, including claims editors, billing and claims, and electronic data interchange clearinghouses.

- In-depth review of the CMS training manual.
- Explanation of how to prepare and develop policy and procedure manual changes, staff training needs, and requirements.

Course Objectives

Upon successful completion of this program, students will be able to:

- Describe the four major objectives that guided the development of ICD-10 PCS.
- Compare structural changes to coding, terminology, and functionality between ICD10 and ICD9.
- Recognize the impacts of ICD10 to policies and procedures, processes, software, billing, and coding.
- Develop plan for addressing the impacts of ICD10 and preparing for the changes, including staff training needs.
- Develop references to enable users to stay current on publication changes and delivery.
- Identify strategies for training personnel on the delivered changes, including:
 - ✓ Coding/billing
 - ✓ Quality Assurance
 - ✓ Utilization Review
 - ✓ Compliance Staff
 - ✓ Information Systems
 - ✓ Outside Vendors
- Prepare plan for Process, Policy, and Procedural re-engineering and documentation.
- Identify IT (software) upgrades required and develop plan for same.

How our online courses work

- **Begin when you are ready.**
- **You are assigned an instructor for one-on-one assistance.**
- **Work at your own pace.**
- **Your work is evaluated and a 70% proficiency is required for a certificate.**
- **You should complete the course within 90 days.**
- **You will receive a completion certificate from York Technical College upon successful completion.**
- **The courses are all self-paced. The instructors respond to the student. Each course has a set of lessons and exams.**
