

Automotive Advisory Council Minutes
Annual Lab/Equipment Evaluation

April 26, 2005

A meeting of the Automotive Advisory Council was held on April 26, 2005 at 7:00 P.M. in the automotive shop at York Technical College. Members in attendance included Mark Abercrombie of Adesa Auto Auctions, Claude Lawson and Billy Hinson of Clinton Family Ford, Jason Currence of Burns Chevrolet, Danny Clinton from Clover High School, and David Bain, Jim Currence, and Jamey Abercrombie of York Technical College.

Refreshments were served and the meeting began at 7:00 P.M. as scheduled. The first order of business was the reading of the minutes from the previous meeting held on October 26, 2004. The minutes were approved as read by all members in attendance.

The second order of business was the lab/equipment evaluation. Each member was given an evaluation sheet that covered the eight areas of instruction that are recognized by ASE. Under each area of instruction the members were asked to evaluate if the equipment met the needs of the class and list any areas where additional equipment may be needed.

The evaluation sheets were returned with the following suggestions. The three old lifts in the D building shop need to be updated. A transmission flush machine needs to be purchased. The transmission dyno is getting old and can not run electronic shift transmissions. A new dyno needs to be purchased. The 134-A recycling machine is getting old and needs to be replaced. A Freon Identifier would be useful to protect a new 134-A machine. A safety glass sanitation cabinet needs to be purchased and installed in the shop in D building and in the shop in G building. A road force tire balancer should be bought to replace the current tire balancer and a new tire machine that can do the larger tires on new cars.

The meeting was adjourned at 8:30 and copies of the evaluation forms have been included in the minutes.

Respectfully submitted,

Jamey Abercrombie
York Technical College
Automotive Department Manager
