COURSE DESCRIPTION:

This course facilitates the application of the nursing process to assist in meeting the needs of the childbearing and childrearing family. Focus is on both normal and abnormal aspects.

COURSE COMPETENCIES:

The student will function in the roles of provider of care, manager of care, and member within the discipline of nursing by the completion of NUR 211 and will:

Module I: Antepartal, Intrapartal, and Fetal Diagnostic Testing

1. Interpret, with supervision, collected data based on the nursing process when providing family-centered care for clients across the lifespan.
2. Interpret, with supervision, collected data based on functional health patterns for selected clients and families across the lifespan.
3. Interpret, with supervision, therapeutic communication techniques to interact with selected clients and families and members of the health care discipline.
4. Interpret, with supervision, legal and ethical principles when providing family centered nursing care.
5. Interpret, with supervision, cultural differences among childbearing clients and childrearing families
6. Interpret, with supervision, critical thinking strategies when providing care for clients and families with common health problems.
7. Interpret, with supervision, health promotion practices for self, clients and families.
8. Interpret, with supervision, safe care for the client and family.

Module II: Postpartum, Newborn Assessment, and Newborn Feeding

1. Interpret, with supervision, collected data based on the nursing process when providing family-centered care for clients across the lifespan.
2. Interpret, with supervision, collected data based on functional health patterns for selected clients and families across the lifespan.
3. Interpret, with supervision, therapeutic communication techniques to interact with selected clients and families and members of the health care discipline.
4. Interpret, with supervision, legal and ethical principles when providing family centered nursing care.
5. Interpret, with supervision, cultural differences among childbearing clients and childrearing families
6. Interpret, with supervision, critical thinking strategies when providing care for clients and families with common health problems.
7. Interpret, with supervision, health promotion practices for self, clients, and families.
8. Interpret, with supervision, normal development and pathophysiology of clients and families across the lifespan with providing family-centered care.
9. Interpret, with supervision, principles of pharmacology and medication administration while providing family-centered care to selected clients.
10. Interpret, with supervision, safe care for the client and family.

Module III: Growth and Development, Family Planning, Sexually Transmitted Diseases and Family with Special Needs

1. Interpret, with supervision, collected data based on the nursing process when providing family-centered care for clients across the lifespan.
2. Interpret, with supervision, collected data based on functional health patterns for selected clients and families across the lifespan.
3. Interpret, with supervision, therapeutic communication techniques to interact with selected clients and families and members of the health care discipline.
4. Interpret, with supervision, legal and ethical principles when providing family-centered nursing care.
5. Interpret, with supervision, cultural differences among childbearing clients and childrearing families
6. Interpret, with supervision, critical thinking strategies when providing care for clients and families with common health problems.
7. Interpret, with supervision, health promotion practices for self, clients and families.
8. Interpret, with supervision, normal development and pathophysiology of clients and families across the lifespan with providing family-centered care.
9. Interpret, with supervision, principles of pharmacology and medication administration while providing family centered care to selected clients.
10. Interpret, with supervision, safe care for the client and family.

COURSE REQUIREMENTS:

1. Three module exams and a comprehensive final will be given. Students will submit a weekly journal to their clinical instructor regarding their own health promotion/self-care goals. This is a requirement for the clinical portion of the course.
2. Students must be prepared to provide client care when reporting for clinical experience.
 - a. Students are expected to meet clinical expectations as stated in the clinical evaluation tool.
 - b. Students will be held responsible and accountable for all content and skills previously learned.
 - c. Students are expected to view concept media CAIs on newborn assessment and labor and delivery and complete appropriate forms **before** their assigned clinical day. Students must complete a satisfactory oral newborn assessment in order to pass the clinical portion of the course.
 - d. Students are required to complete one satisfactory care plan on a pediatric client and one on a postpartum client.
 - e. Students are expected to complete a satisfactory reaction paper for the labor and delivery experience. This is a requirement for the clinical portion of the course.
4. Students must participate in a two-hour pediatric community service experience.
5. Students must take the assigned standard computerized exams for this course and pass them at or above the national level with a maximum of 2 attempts. The student will receive 2.5% towards their final grade upon passing of each exam. In order to receive the 2.5% credit for passing the standard exam, it must be passed by the second attempt. Written remediation is required before each repeat exam.
6. Students are expected to adhere to institutional policies. This includes policies of the nursing program and policies related to the clinical agencies utilized for clinical experiences.
7. Nursing faculty strongly encourage students to spend study time utilizing the resources in the CAI Lab, Academic Success Center, and/or both libraries to supplement textbook and classroom activities

8. Students are expected to take all exams on the scheduled day. There will be one make-up day at the end of the semester for missed unit exams. The make-up exam may be an alternate format. Students who are tardy for tests will be required to take the test on the make-up day.
9. At the completion of the course, each student is expected to turn in a self-evaluation to his/her clinical instructor.
10. Computer requirements for this course: Internet Explorer 5.0 or later, CD Rom drive, and a sound card.

Attendance and Punctuality

In order to meet the objectives of class and clinical and to promote professional accountability, the following requirements for attendance will be enforced:

- Students must attend a minimum of 90% of all scheduled classes.
- Clinical absences: Completion of a clinical absence assignment will be required. If the student is absent from greater than 10% of the total clinical hours for the course, he/she may be subject to dismissal.

The clinical attendance policy is written on the front page of the clinical evaluation tool. This will be reviewed and must be signed by the student prior to the initial clinical experience.

Clinical Tardiness: Tardiness is defined as arriving at a clinical or agency site after the assigned start time. A clinical "N" will be assigned for the first two clinical tardies. A third tardy and all subsequent tardies will constitute a clinical "U." Instructor discretion will determine if a student will be allowed to remain in the clinical area. Documentation of a clinical "U" is to be signed by the clinical instructor and the student.

Academic Integrity

Any student found guilty of cheating, dishonesty or plagiarism will be given a grade of "0" on an exam or written work and will be subject to further disciplinary action. Plagiarism refers to, "The act of appropriating the literary composition of another, on parts or passages of his writings, on the ideas or language of the same, and passing them off as the product of one's own mind." (Black's Law Dictionary, 4th edition)

Students will be expected to sign a statement at the end of each exam indicating that the student has maintained academic integrity.

Methods of Instruction

CD, online communication software, assigned reading, audiovisuals and computer lab experience, handouts, written assignments, discussion, clinical client care experiences and observations, clinical group conferences, individual conferences, study guides/learning exercises.

MINIMAL STANDARDS

The student will demonstrate course competencies as stated in the syllabus. Student evaluation for the course includes a graded theory component. A grade of satisfactory/ unsatisfactory will be given for the clinical performance component. A student must achieve 80% in the theory component and a satisfactory rating in the clinical component in order to successfully complete the course.

An average grade below 80 constitutes failure of the course regardless of the clinical rating.

EVALUATION STRATEGIES/GRADING

A. Theory Component

Student evaluation for the course includes a graded theory component and a satisfactory/ unsatisfactory rating for the clinical performance component.

Grading

A 91 -100
 B 86 - 90
 C 80 - 85
 D 70 - 79
 F Below 69

Policy for Grading

Average score of three module exams	75%
Comprehensive Final Exam	20%
Successful completion of the two standard exams at or above the national level by the	
Second attempt (2.5 % each)	<u>5%</u>
	100%

Grades will be rounded to the nearest whole number after final computation of grades. Any student who has an average module exam grade of 91% or above will qualify to exempt the final exam. In order to qualify for the exemption, all module examinations must be taken on the date scheduled. Any student taking a make-up exam will not qualify to exempt the final exam, regardless of their exam average. If the student qualifies to exempt the final exam, the module exam average will constitute the final exam grade when the course grade is computed. All students, regardless of their average, are expected to take the final exam. Any student found guilty of cheating or being involved in plagiarism will be given a grade of “0” on an exam or written work and will be subject to further disciplinary action.

Disabilities Statement: (YTC Students)

Any student who feels s/he may need an accommodation based on the impact of a disability should contact the Special Resources Office (SR) in the 300 area of Student Services on the York Technical College campus. The office phone number is: 803-327-8007

Proctoring Exams

Students must be in their seats at the designated exam time. Students who are tardy for any exam will be required to take the exam on the make-up day.

Students are expected to leave all books, notes and personal belongings at the front of the room during each exam and exam review. Only pencils will be allowed during the exam. Instructors will circulate within the room while the exam is being taken and reviewed. Only calculators provided by the schools will be allowed for drug dosage computations on NUR 211 exams.

Exams will be reviewed as scheduled. Students may review each exam at the designated time only. Exam grades will be posted on the course coordinator’s web board no later than 7 days after the exam has been given.

B. Clinical Component

Evaluation of clinical performance will be measured by utilizing the evaluation tool developed for NUR 211. Students are expected to familiarize themselves with the evaluation criteria prior to entering clinical. Identified behaviors will be measured by the clinical instructors through observation of actual clinical performance and documentation of findings. A summative evaluation of performance will be done on a weekly basis with written and/or verbal feedback provided to the student. A summarized evaluation of clinical performance will be completed at the end of the semester. The student is expected to sign each instructor note and promptly return the evaluation tool to the instructor.

The grading scale on the clinical evaluation tool will consist of an “Exceeds Expectations” (E), “Satisfactory” (S), “Needs Improvement” (N), and an “Unsatisfactory” (U). A student receiving three Unsatisfactory clinical ratings during the course will fail the entire course.

The student is encouraged to request conferences with the instructor as needed to facilitate acquisition of clinical competence. Within 5 days, the instructor will initiate a required conference with

the student who received a clinical "U" to discuss behaviors that resulted in the "U" and to provide guidance and recommendations to be followed by the student.

This conference will be documented by the instructor and the student. If a student receives three (3) "U"s in one semester, the student will not be allowed to continue in that course and will receive a grade of "F" for the course.

A summative evaluation of clinical performance, using the Evaluation of Clinical Performance Tool, will be completed at the end of each semester. A copy of this evaluation form is included in the syllabus addendum. A scheduled conference may be held at any time at the request of the student or the instructor to discuss clinical progress.

A summative clinical performance evaluation of unsatisfactory constitutes failure of the course, regardless of the theory grade.

In order to pass the clinical portion of the course, the student must satisfactorily complete:

- One care plan for a pediatric client with two nursing diagnoses
- One care plan for a postpartum client with two nursing diagnoses
- An oral newborn assessment
- A reaction paper for labor and delivery experience
- Five weekly self-health journal entries
- Two (2) hours community service

Any breach of client confidentiality will result in a clinical failure.

Material regarding clients may not be photocopied or printed while in the clinical facility. Students may make their own client notes without using the client's name/initials while doing clinical preparation.

Students are expected to turn in care plans, journals, and other assignments on the designated day unless other arrangements are made. All clinical assignments will require a satisfactory grade in order to pass the clinical component.

Learning Resources Component

As a future member within the discipline of nursing, the student is expected to assume responsibility for learning. Faculty encourage and expect students to utilize critical thinking resources that will help develop this attribute. Pertinent resources could include nursing journals, on-line resources, CAI programs, selected videos, and supplemental texts.

CAI Lab

Students must adhere to York Technical College/USCL CAI lab policies in the Nursing Student handbook. Please do not attempt to use the disk provided with any text in the CAI lab without asking for assistance from CAI lab staff. CAI Lab Hours will be posted on the CAI Lab door.

ENTRY-LEVEL SKILLS: See evaluation tool

PREREQUISITES: NUR 159; BIO 210, COL 101, ENG 101

CO-REQUISITES: BIO 211; PSY 201
